

DIDSBURY PIONEER

VOL. XXVIII. 17

DIDSBURY, ALBERTA, THURSDAY, APRIL 30, 1931

\$2.00 per Year. 5 cents a copy

E. G. RANTON BUYS RANTON'S LTD. STOCK

The people of Didsbury will be pleased to hear that Mr. E. G. Ranton has been successful in obtaining the stock of Ranton's Ltd. and the business will now be carried on under the firm name of Ranton and Mr. Ranton will be in full control.

Mr. Ranton has managed the business for Ranton's Ltd. for the past three years and previous to that time he had a lifelong experience in the mercantile business in Winnipeg and Edmonton. During the time he has been here he has made himself popular with the buying public by the excellent service he has been able to give while working for the company. He states that now having full control of the business he will be able to render even better service.

He is inaugurating the commencement of the new firm by a large bargain sale, the large posters advertising the sale are now in the mail.

Ed. says that he was able to buy the stock at a bargain and he is passing the benefit of the bargain on to his customers.

Canadian Legion Holds Interesting Meeting

The regular meeting on Saturday night of the Canadian Legion was of more than usual interest. Conrad R. Webster gave a splendid paper on "The Landing at the Mole, Zebrugga." By means of a chart he showed the position of the warships during the action and told how the freighters loaded with cement were sunk to close up the passage.

Mr. Webster was on the "Benedictine" the leading warship in the attack. He gave a graphic description of the action and stated that 470 were killed and 350 wounded on the warship in 40 minutes' fighting. There was a good attendance of members and all present appreciated the lecture. This is the first of a series of papers which will be given at these meetings.

Rev. J. H. Curtis will conduct a service in the Westcott Baptist Church at 3 p. m. on Sunday May 3rd.

\$30,000 Fire at Olds.

Olds suffered a severe fire loss on Saturday afternoon last when a fire thought to have been started by transients in the North End Livery Barn totally destroyed the large two-story McKeecher implement warehouse and ivory stable, a residence owned by William Smith and a disused one-story school building. Damage was estimated at between \$25,000 and \$30,000.

Burning embers were scattered in every direction and but for the fact that the blaze took part at the north end of the town, with a slight north-east wind blowing, a much more serious fire might have occurred.

Flames for a time threatened the new \$75,000 three-story school building and several fires were started on the roof of the nearby two-story brick schoolhouse, which is unoccupied. Another school frame building also burned and in the same block was partly destroyed.

Raging like a furnace, flames consumed the \$10,000 implement warehouse and livery stables within half-an-hour and it was estimated on Monday by Gibson and Watson implement agents that more than \$15,000 of machinery was lost. It was stated that the building and machinery were fully covered by insurance.

Burning embers blown from the burning buildings started prairie fires in all directions, being reported as far as a mile north of town. The fire brigade, under John Jensen, prevented flames spreading to the McKeecher lumber yard and coal sheds, which were menaced when the grass ignited.

Attend W.C.T.U. District Convention

Quite a number of Didsbury ladies attended the district W.C.T.U. convention which was held at Olds on Tuesday and Wednesday.

Amongst those who attended are: Mrs. H. M. Reiber, president of the district; Mrs. Bettger and Mrs. Madoche, delegates of the local branch; Miss Cressman, Mrs. Hallman, Mrs. Cunningham, Mrs. L. Wrigglesworth and Mrs. J. V. Borscht.

Misses Lucile Malloch and Margaret Kercher attended as delegates for the "Y" group.

LOCAL & GENERAL

C. E. Reiber was a business visitor to Calgary on Tuesday.

Mr. W. A. Teskey and Bill Teskey made a trip to the southern city on Monday.

Miss Laddie Snyder spent the week-end with Miss Edith Hunsinger.

The Elevators will be closed on Wednesday afternoons during the summer after the 1st of May.

Miss Lily Befus, of Westcott is in the hospital where she received a major operation. She is progressing favorably.

Mr. Gordon Sherrick, who was operated on for appendicitis at the hospital last week is improving nicely.

English Watches, Grandfather Clocks, and Chinoes. Everything Ancient and Modern. Bring it to W. Monteith, North End Jeweller.

Roosch School opened their softball season with a game with Moxers School. The score was 23-12 in favor of Moxers.

Philip Flemming representing the Canadian Jersey Cattle Club at Ottawa spent several days with Mr. and Mrs. Norman Clarke.

Mr. and Mrs. Cecil Price of High River motored to Didsbury on Sunday to visit Mrs. Price's sister, Mrs. Eward Clarke.

"The Widow from Chicago" at the Opera House on Monday, May 4th. All-talking. Admission: 25 cents to Everybody.

Mr. and Mrs. Ranton were visitors to Calgary on Monday. While there, Mr. Ranton made arrangements to take over the business of Ranton's Ltd.

A General Hospital for sick Watches, Clocks, Phonographs, Sewing Machines, Etc., Etc. in front corner of Club Lunch. All work guaranteed.—Advt.

"With Byrd at the South Pole" at the Opera House tonight (Thurs.) See this greatest event of modern times. Regular prices. "The Indians are Coming," a new serial starts with this picture. No extra charge.

At the Opera House on Thursday, May 7th, "Viennese Nights." A spectacular story daintily conceived and lavishly produced. Talking and singing. 25c. and 55c. 2nd episode of serial.

Week-end tickets will be issued by the C.P.R. every Friday from 12 o'clock noon and are good for return until midnight the Monday following. These fares are effective from May 1st to August 1st. Fare and a quarter for the round trip.

Birdhouse Competition.

The birdhouse building competition which is being sponsored by the Atlas Lumber Company will interest boys both in town and country.

Their contest is not only to interest the boys in birds, but also to encourage them in the use of tools and should have the interest of all the parents.

Particulars of the contest will be found in the advertising columns.

Tennis Club Organize.

An enthusiastic meeting of the supporters of the game of tennis was held on Tuesday night, at which the following officers were elected: Nick Lamade, president; Art Reiber, sec. treas; Russell Borchert and Bob Eubank, grounds committee. The very low fees of 3.00 for men and 2.00 for ladies, was decided upon for this season, as it was thought that it would attract a larger membership. Work will be started at once on the courts and grounds committee expect to have them in good shape to play on in the near future. Come and play tennis, the best and cheapest of summer sports!

There was only a small attendance at the softball meeting Tuesday night. A membership committee was appointed and a meeting to organize will be held at C. E. Reiber's office on Friday evening at 8.30.

Mrs. Lily Miles, who has been visiting in England for the last four months returned home on Wednesday. She sailed on the "Empress of France."

"H.M.S. PINAFORE."

The Knox United Church Choir has been successful in bringing to Didsbury on Friday, May 8th, the most popular of Gilbert and Sullivan's light operas, "H.M.S. Pinafore," which will be presented in the Opera House by the Olds Choral Society.

No expense has been spared to make the opera as perfect as possible. The costumes, which are to be in the vogue of the period and the singing of the rousing sailor choruses by the forty voices are features that will assure the success of this production. Such a performance is seldom seen outside of the large cities and the people of Didsbury and district are in for a rare treat.

It is a mammoth production, but we believe our neighboring masicians are equal to the occasion, under the leadership of W. C. Gosder, whose musical ability needs no introduction to a Didsbury audience.

The reserved seat plan is at H. W. Chambers' Drug Store and many, no doubt will take advantage of this advance sale of tickets.

Come and meet the Admiral of the British fleet, Sir Joseph Porter, K.C.B., and Dick Dendrey, the unpopular sailor.

Rev. W. W. Krueger, District Superintendent Evangelical Church will be here to assist in the local Evangelical Church services over the coming week end. The fourth and last quarterly business meeting of this conference year will be conducted under his chairmanship on Friday evening. Sacrament of the Lords Supper will be observed on Sunday morning. Sermon by the visiting minister.

Why France Is Economically Strong

Trying to ferret out the reason why France, of all the major nations, has no unemployment, but rather is requiring 2,000,000 others to work in her fields, mines and factories, President Thion writes in the *World's Work* on "Why France is the Tonic Day."

All the champions of French technique are working. Portuguese workers have been imported in throngs to supply the shortage of labor. Italians armed with picks and shovels follow Napoleon's trail over the Alps, in reverse order. Three hundred thousand Poles are given jobs last year. There are no idlers, no Communists, no bread lines.

The findings on something as obvious as idleness are hard to understand. They waste nothing. They know how to stretch French paper to make the two ends meet. Nothing is wasted.

Nor does this mean they have poor food. They furnish the chefs of the world. They do not dress shabbily. They dress the world. But they dress themselves first.

They buy for cash. They pay down in full for real estate. No many know what call money is. Money is on printed paper only. High-powered salaried men are an American institution. French cars seldom wear out carrying heavy mortgages around. Every large business concern has its economist. Employees get good meals at cost. The economists purchase at wholesale prices. Railway employees even get their coal and household supplies for a third what others pay outside of the economy. Companies do not exploit or commercialize their help.

The Frenchman hardly knows what a robot is. About everything is hand made. A country that is many times smaller than any one of our Western Provinces supports its millions by managing its individual affairs well. Thus the underdog has become top-dog.

Is there not in the French situation as this disclosed a suggestion of value worthy of the thoughtful consideration of the producers and workers of other countries?

Here in America, in Canada as well as in the United States, every encouragement, indeed the most stirring inducement, is held out to people in all walks of life to buy on the installment plan, rather than for cash. The use of credit has become almost universal, not only for capital expenditures, which is justifiable and proper if the borrowings are kept within reason, and the capital expenditures to which they are devoted are of a revenue-producing character, but for current expenses. People are urged to buy not only necessities but luxuries on the credit plan with payments spread over a term of months or even years. The moment an appeal is made for it to enjoy these luxuries now and while you are paying for them, rather than to wait until you have saved sufficiently to pay for them outright. It is a fallacious argument, a fatal mistake to make.

Complaints are fairly general that the banks will not extend credit at the present time. Possibly, however, the mistake by the banks in the past is that they extend too much credit too easily, coupled with the further mistake that they demand too high a rate of interest and thus make it too impossible for the borrower to ever get out of debt once he is landed in that position. Many a man, both city residents and farmers, have told the writer that having got into debt to the banks or mortgage companies they had a long uphill struggle to get out. They found themselves working for these financial corporations to meet interest charges rather than for themselves. They weened that once they got out of debt, they would never get in again, but rather would do without things until they could pay for them outright, lighten their belt if necessary and carry on in the meantime.

It is the man who is carrying a load of debt, paying heavy interest charges annually, possibly on non-revenue producing expenditures made in the past, who finds himself in real difficulty in times of business depression. Any little cash he can get must be paid out again to keep himself solvent instead of being available to carry him along until the tide turns again. But the man who has followed the policy of "pay as you go," who is free of debt, is the man who can most easily weather the storm. Such a man can "carry on," but the man already heavily in debt finds himself in the predicament of going in still deeper, and the final result is, all too frequently, that he finds himself in an impossible position, so deep in fact that he can never get out.

Is the French way not the better way? Does it not make for greater contentment, a more consistent measure of good times, a more enjoyable, happier existence?

To Print Address

Categorized as a "speech of international importance," one thousand copies of the recent address of Hon. Hugh Guthrie, Minister of Justice, before the American Bar Association, are to be printed in the records of the United States senate. It was learned recently.

Should Look After Himself

A traveler in the Orient asked a pasha, "Is your civil service like ours?" Are there retiring allowances and pensions? "My illustrious friend," replied the pasha, "the public functionary here who stands in need of a retiring allowance when his term of office expires is a fool!"

End Of Communism

McGill Economist Sees Soviet Despotism Followed By Human Nature

"Russia is going to break. Communism will prove unworkable, the five-year-plan is doomed to failure, and the greatest despotism and tyranny that the world has ever seen will be followed by human nature," declared Dr. Stephen Leacock, head of the department of political economy of McGill University, addressing the junior board of trade of Montreal recently on Communism.

The professor issued a warning that, unless nations move off the correct means of destroying Communism in Canada, "The needs of the people which lead them to seek after anything new must be satisfied as the first and only step required to do away with this evil is to lead, referring to Communism in this country."

What was going to happen to Canada and other parts of the western world before Russia's five-year-plan failed, Dr. Leacock asked, "Are we going to sit back and condemn Communism and do nothing to cure the evils of present-day civilization? Are we to permit Russia to set us and the rest of the world an example in energy and determination in the exploitation of their country?"

BREAKS UP GAS IN THE STOMACH

Don't suffer from discomforts get around around your head, from indigestion, acidity, flatulence or pain of the stomach. When you take a little of this, you will find it breaks up gas, acid, and indigestion, and makes the stomach strong and healthy.

Military Medal Law Revised

Holders Of V.C. Cannot Be Automatically Deprived Of Decoration

Holders of the celebrated Victoria Cross, highest award for gallantry in Britain's army, will not, in the future, be automatically deprived of the medal if convicted of "treason, cowardice, felony or any other infamous crime," as has been the case in the past.

This important change is one of the new provisions governing military medals announced in the *London Gazette*. It is stipulated, however, that the award of the V.C. may be cancelled by the king, who may also restore the decoration, if and when the recommendation for annulment is withdrawn.

Persian Babu imparts a rare charm and distinction to the woman who uses it. Fragrant as a flower, deliciously cool to the skin, it always results in complexion, delightfully young and lovely. Indispensable to every dainty woman. As a powder base for oil-textured skins or as a beautifying lotion, it is unrivalled. Tones and stimulates the skin. Recommended also to soothe and make the hands tastefully white.

Sealand-Breeding Aviation

Dundee, Scotland, recently held an informal publication over the first business transaction carried out there by aeroplane. A business man had flown from Glasgow, landed in a field over Dundee, completed his deal and within an hour was on his way back by air. As a result of the visit, Dundee is joining the movement to provide an airport for every city in Scotland.

The women that defend children from their both are as two birds, those that find judgement in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the stomach and if not interfered with, work havoc there. Milburn's Worm Powders discharge both and, while expelling them from the system, serve to repair the damage they have caused.

Half and Half

A lady much above the usual size was trying to enter a street car. A passenger, who was waiting to get on, began to laugh at her futile efforts.

"If you were half a man, you'd help me on this street car," snorted the fat lady.

The passenger retorted, "Madam, if you were half a lady, you wouldn't need any help."

Proposes New Study For Canadian Schools

First-Aid and Home Nursing Useful Subjects, Says Colonel Hudgins

First aid and home nursing should be made subjects in public schools, declared Col. C. A. Hudgins, director-general of the St. John Ambulance Association, at the annual meeting of the organization in Ottawa. This type of training would, he said, be more useful than "some of the twaddle" now being taught.

The year 1930 was described as surpassing all other years in the history of the association. In the various courses, 23,398 persons took part and proficiency certificates were awarded in 12,554 cases. Certificates and awards had a grand total of 19,718. The annual report was presented by Hon. J. H. King, president.

Perhaps the world may owe you a living, but you will die of starvation if you sit down and wait for it to call and settle.

Giant X-Ray Tube

Will Be Used in the Treatment Of Cancer Patients

A giant X-ray tube, developing 400,000 volts, has been developed at the California Institute of Technology, for treating patients suffering from cancer, a formal statement issued by the institute announced.

The statement said that, "As Dr. Robert A. Millikan has previously stated, the institute does not profess to have discovered a new cure for cancer; the principal hope is, that if results are favorable, other tubes of similar type will be placed in operation in hospitals in other sections of the United States."

Good Price For Livestock

The Manitoba Agricultural College recently shipped three baby beavers to the Union Stock Yards markets, which established a new season's "top." The beaver averaged 900 pounds and sold for \$8.00 per hundredweight.

Prairie Provinces May Obtain Deep Sea Fish Requirements From Hudson Bay Region

Western Canada's hope for a steady supply of fresh fish from Hudson Bay and Strait need not be dashed by the discouraging report issued late last year by the traveler expedition which spent the summer in the bay.

This expedition caught no fish, but in the fisheries department at Ottawa this fact is not regarded as a knock-out blow to the project of a fishing industry in the northern waters. On the contrary, Hon. Edgar S. Rhodes, the Minister of Fisheries, says he will be much surprised if in due course Hudson Bay and Strait do not give the west a steady supply not only of river fish but of deep sea fish.

Mr. Rhodes is a Nova Scotian, but has been domiciled in the prairie of that province most of his life, and has had charge of the Dominion fisheries only since August last. Therefore he admits a lack of detail knowledge about the fish resources of Hudson Bay and Strait. He knows, however, that the estuaries and rivers running into the bay contain plenty of edible varieties and he expects that the deep sea fish will be available from the Strait. Last summer's expedition did not touch the rivers of the coast.

Discouraging results, however, Mr. Rhodes noted that the transfer of the natural resources had taken the lake fisheries of the prairie outside the jurisdiction of his department. Fish in the prairie lakes and streams will hereafter be caught under the jurisdiction of provincial authorities. The Dominion department is ready to give aid in solving the technical and selling problems of the lake fishermen, but its primary concern now is with the coast. There have been only two visits up till lately, the Atlantic and the Pacific, but the completion of the Hudson Bay Railway brings a third into the picture.

No country has a more difficult fisheries problem than Canada, thinks Mr. Rhodes. A great majority of Canadians live more than 1,000 miles from the ocean. They eat much less fish per head than the British people, and Mr. Rhodes believed they ought to have more fish dinners to balance their diet properly.

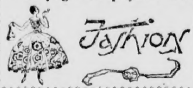

The problem is to get the fish to them while fresh. Mr. Rhodes hopes to see Hudson Bay and Strait fisheries play some part in solving this difficulty in the Canadian middle west.

Proving Its Worth

Cow Testing Essential To Success In Dairy Farming

In these days when efficiency in production is so essential to success in farming, whether on a large or small scale, cow testing is proving its worth. Daily weighings of milk arouse a farmer's interest in his dairy herd and encourage him to give attention to those little details so essential to success. Supplemented by periodical visits by the Dairy Promoters and "fat" tests daily weighings provide a reliable guide to intelligent feeding and increased production. The "bushy" cow who will not earn her keep even with the best of feeds can be weeded out and the production from good cows increased. —Department of Agriculture, Ottawa.

Winnipeg Newspaper Union

(By Annette).

FAVORITE BECAUSE OF ITS YOUTHFULNESS

This pattern model is especially nice in printed crepe silk for street or spring. The shoulder caplet adds much charm and outlines. And into the bargain the sleeves may be omitted because the cape covers the upper part of the arms for more formal wear or for resort.

The skirt is slightly flared and shows a flat silhouette through the hips.

Style No. 208 may be had in sizes 14, 16, 18, 20 years, 22, 24 and 40 inches bust.

Plain flat crepe silk, very woolen in plain or print, sixty rayon novelties, wool challis points, linen, tartan and cotton are lovely for this model.

Spring, the season of prettiest styles, will soon be here. Prepare now by ordering a copy of our new Fashion Magazine. Attractive styles for women, misses and children. And instructive lessons in sewing.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap cash carefully.

Buy Approved Chicks

Approval Policy Established As An Outstanding Achievement

In carrying out its Poultry Club Campaign among Quebec farmers the provincial government has authorized the purchase of "day-old-chicks from approved hatcheries only." This is a splendid endorsement for federal approval policies which all combine to produce the "approved" chick. The Poultry Division of the Dominion Department of Agriculture supervises the now officially recognized "approval" policies, which include Record of Performance, certification and registration, flock approval, hatchery approval and approved chicks. Government supervision is the safeguard which has established the approval policies as the outstanding achievement in the poultry industry in recent years.

Holding Doesn't Pay

Farmers Urged To Market Eggs In Very Best Condition

Holding eggs for a "rise in the market" doesn't pay, as a recent report from federal inspectors at Winnipeg clearly shows. It reads: "The majority of receipts are of good quality, although some held eggs are in evidence. These invariably grade seconds, showing the effects of holding perishable products for any length of time in anticipation of a higher market." At the time this report was received the spread of extras over seconds was five cents per dozen. The Egg Marketing Service of the Dominion Department of Agriculture urges farmers to market their eggs in the very best of condition, which naturally is as soon after laying as possible, so that they will get the benefit of efficient grading.

Feed To A Finish

Farmers who are feeding cattle for beef should note carefully the following excerpt from the Live Stock Market Report of the Dominion Department of Agriculture: "Shippers are bringing in considerable numbers of half-fat cattle. The market has enough depressing factors to contend with, and shippers are requested, in their own interest, not to sacrifice half-finished stock and thereby adversely affect the market as a whole. Feed your beef cattle to a finish and get all the market to offer."

TAKES OVER DUTIES AT CAPITAL

The photograph above shows M. Arsene Henry, Finance's new minister to Ottawa, and Mme. Henry, as they appeared above the liner that brought them from their native land to New York. M. Henry arrived in Ottawa, March 11, to take over his new duties.—Associated Press Photo.

Coal Consumption In Canada Has Decreased And Drop Attributed To Increased Use Of Electricity

Safeguard For Waiters

New Invention Closes Door To Open Without Trouble

A door which opens of its own accord based on the "invisible" ray principle, has just been put into operation at "Oxford." About 10 ft. away from one of the service doors on the first floor a light has been made to shine on a photo-electric cell suspended opposite, and when a waitress approaches this door she passes across the line of light and breaks it for a moment. This gives impulse to an amplifier on the other side of the service door, and this impulse operates on a delicate electrical apparatus in such a way as to cause the spring coil attached to the top of the door to draw back, and the door opens.

SELECTED RECIPES

PAIRER HOUSE ROLLS

- 2 cups scalded milk.
 - 1 tablespoon salt.
 - 1 yeast cake.
 - 4 tablespoons "Mazola."
 - 2 tablespoons sugar.
 - 2 cups warm water.
 - 6 cups flour.
- Scald milk and when cool add yeast dissolved in warm water. Stir in milk, "Mazola," salt and sugar. Add three cups bread flour and beat well, then let rise in a warm place until doubled in bulk. Cut down and add three more cups of flour. Knead until dough no longer sticks to fingers, then let rise again until doubled in bulk. Roll out and cut with round cutter. Brush over with "Mazola" and fold over. Bake in oiled pan in quick oven.

Have To Prove It

When Paris commuters tell their boss their train was late, they have to produce documentary evidence in support. Every time a train from the suburbs is delayed, officials give out slips on which are shown the time and place of departure and the exact time of arrival at the terminus.

Coal consumption in Canada has decreased approximately three and a half million tons in the past year.

Statistics now available show the quantity of coal made available for consumption in Canada, in 1926, was 31,865,889 tons the preceding year. This decrease is due to several causes, one of which is the increasing use of electricity as a medium of power for operating factories, newspaper mills, saw mills, etc., and to the increase usage of water power instead of electricity. Of the total power used in manufacturing industries in 1926, it is estimated 72 per cent. was electricity. In 1920 and 1926, this percentage is expected to have been greater.

It is estimated electric power has displaced the consumption of coal in Canada to the extent of 14,500,000 tons in 1926. This estimate is based on the average coal consumption per kilowatt hour of all public utility electric power plants in the United States during 1926, which places the equivalent of coal to electricity at 1.26 pounds of coal per k.w.h.

While the consumption of coal last year shows a decrease, the output of central electric generating stations has increased from 18,914 million kilowatt hours, in 1925, to 18,256 millions in 1926. The large stations generating approximately 88 per cent. of the total electrical output, generated only 302 million kilowatt hours by steam power in 1926 as compared with 321 millions in the preceding year.

Statistics issued by the Dominion Bureau of Statistics of Canadians during the past week indicate a continued downward trend in wholesale and retail prices, a definite upward movement in the prices of industrial and public utility common stocks as well as mining stocks, and no changes in the index number of interest rates calculated from the yields of the most popular bonds.

Prince Albert National Park

A Number Of Summer Homes To Be Built This Year At Northern Resort

Construction in Prince Albert Park will be abnormally heavy this year, judging from present indications. A Saskatchewan citizen whose name has not been disclosed, intends to erect a \$10,000 summer home at Prospect Point, park residential subdivision. Nine others intend to erect cottages, the average cost to be \$2,000. This information was given out by J. A. Wood, superintendent of the park. Additional accommodation for those who do not care to erect their own tents, and a number of improved buildings will also be erected this summer.

What the program of park developments for the summer will be depends entirely upon what weather will be available in the department of interior appropriations. No definite information in this regard is yet available.

Not So Comfortable

The lady was visiting the post of her district, and in one of the cottages lived poor old Mrs. Murphy, a widow. After several unsuccessful attempts to make conversation the lady asked: "Was your husband in comfortable circumstances when he died?"

"No, mum," replied Mrs. Murphy, "he was left under a train."

"I have tickets for the theatre."

"Good, I will start dressing at once."

"Do, dear, they are for tomorrow night."—H. Travasa, Rome.

In Planting Grass

Proper Preparation Of The Soil Is Essential To Success

The fine seeds of grasses and legumes require a firm soil that is fine in tilth, and moist. They are very small in size and if seeded too deeply will produce plants which either lack in vigour when they emerge above the ground or are completely smothered. The soil should be firm so that the seed will not be buried too deeply and so that moisture will be near the surface to facilitate the germination of the small seeds before the nurse crop becomes sufficiently well established to smother the small seedlings. —Experimental Farms Note.

Chickenman: "I cut through the outer door with an oxy-acetylene torch and then used dynamite."

Judge: "Two years! Wait a minute—could you get a chicken out of my furnace for me?"

"And, you will soon live in a lovely villa."

"Yes, but as mistress or maid?"

Montague, Charles.

Proclamation.

I hereby proclaim May 1st-7th CLEAN UP WEEK. Let All Good Citizens do their utmost to make our Town clean and worthy of its good reputation in the interests of health and fire protection.

Dated this 29th day of April, 1931.
H. W. CHAMBERS,
Mayor,
Town of Didsbury.

Local News

"H.M.S. Pinafire" at the Opera House on Friday, May 8th.

Mr. and Mrs. A. W. Axtell are moving into the Fulkerth residence in the north part of town.

Rev. A. E. Hayes is this week writing an examination in connection with a post-graduate work.

Word has been received of the death of the 4 years old daughter of Mr. and Mrs. Otto Kreuger, of Swallow, who died on Tuesday evening. The funeral will be held at Swallow on Friday afternoon, Rev. H. E. Roppel officiating.

The intermediate group of Christian Endeavor of the Evangelical Church will hold a social tea and bake sale at the home of Mrs. Harry Gable, Saturday afternoon, May 2nd. Proceeds go to missionary and other C. E. work. Everybody cordially invited.

Friday afternoon will see the commencement of the sports schedule for the High School pupils. Oids High School play the local school basketball team and Oids and Didsbury girls basketball teams will also meet. Both games will be played here.

On Sunday, April 26th, Norman Clarke left for British Columbia where he will select registered Jersey bulls for some of his Alberta customers. He expects to visit the big Jersey breeders in the Okanagan, Fraser Valley and Vancouver Island. There has been a tremendous demand for Jersey stock in Alberta during the last six months. Much of this demand has been created by the Didsbury Jersey Farms. During recent weeks shipments have been made to several parts of Southern Alberta.

Obituary.

RYRI

Miss Violet Sylvan Byrt, 23 years of age, died on Sunday in a Calgary hospital. She was born at Llantrisant, South Wales and came to Alberta nine years ago with her parents, settling in Westcott. She worked at Didsbury General Hospital and went to Calgary two years ago.

Surviving are: her parents, Mr. and Mrs. Frank Byrt, of Elton, Alberta; three brothers, Francis, George and Charles, all at home; three sisters, Nancy and Barbara, also at home, and Mrs. Jack Bagshaw, of Carstairs.

Funeral services were held from Westcott Church on Thursday, 30th April at 2 p.m. Interment was made in Didsbury Cemetery.

TESSIER

William Tessier, farmer, residing at Bottrell, Alberta, died on Sunday in a Calgary hospital, following a long illness. Funeral services were held on Tuesday morning, the 29th April at 11 a.m. from Armstrong's Funeral Home, Calgary, Rev. Robt. Magowan officiating. Interment was made in Burnside Cemetery.

Burnside Notes

Mr. and Mrs. Billy Dick visited at Mr. A. A. Jenkins Sunday.

Mr. Ernest Walker of Torrington was a Sunday visitor at Noah Eckel's.

Mr. and Mrs. Woods were visiting at Mr. Joe Clark's on Sunday.

Mrs. E. Page left on Friday for a trip to her old home in England.

Mr. Sam McAllister spent Sunday with Mr. George Metzgar, who is convalescing after his recent severe illness.

Mr. Ralph Long who is spending the summer near Acme, spent Sunday at Mr. Noah Eckel's.

The Lone Pine W. I. will meet in the Lone Pine Hall on Thursday May 7th. The Constituency Convenor Mrs. Hosegood is expected to be present and address the meeting.

The theme this Sunday in Knox United Church is "Courage"—a spring theme for the depressed, based on J. M. Barrie's address to the students of St. Andrews University.

"A WONDERFUL CANADIAN GROWTH"

CANADA!—Well, well! Who would have thought that the little vine root I saw planted fifty years ago would cover the world in that time.

[Reprinted from Montreal Daily Star, March 2, 1931, by courtesy of Mr. A. G. Racy.]

WHEN CHILDREN FRET

THERE are times when a child is too fretful or feverish to be sent to sleep. There are some pains a mother cannot put away. But there's quick comfort in Castoria!

For diarrhea, and other infantile ills, give this pure vegetable preparation. Whenever coated tongues tell of constipation, whenever there's any sign of sluggishness, Castoria has a good taste; children love to take it. Buy the genuine—with Clus. H. Fletcher's signature on wrapper.

Fletcher's CASTORIA

WORLD HAPPENINGS BRIEFLY TOLD

Hon. Maurice Dupre, solicitor-general for Canada, has been made a Dominion King's Counsel, according to the Canada Gazette.

Charles Viney Helliwell, soldier under General Wolseley in the first Red River expedition in 1870, is dead, aged 84 years. The veteran soldier also participated in the Fenian Raids in 1871.

The Old Clover Point Rifle Range, a three-quarter mile strip of natural sea frontage, has been leased to the city of Victoria for park purposes by the federal department of national defence.

Less economy and more spending were suggested by Rt. Hon. Arthur Henderson, Foreign Secretary, at a luncheon in Hull, England, as the best methods for reviving trade and industry. He declared the world was suffering from "too much economy."

Mahatma Gandhi has refused to allow his admirers to immortalize him in stone. He said money which might be spent in such a statue could far more appropriately be devoted to "ameliorating the deplorable condition of the poor."

More than \$50,000 automobile accidents occurred in the United States last year, and they killed 32,500 persons, and injured \$62,000, the Travelers Insurance Company reports. Deaths increased 45 per cent. over 1926.

A report upon the ice cream industry in Canada for 1929 shows that during thirteen years the production of this commodity has increased by 170 per cent. and its value by 222 per cent. the amount in 1929 being 9,767,436 gallons, and the value \$12,604,769.

CORNS LIFT OFF

Pain Stops!

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes, it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 35c.

What a Hen Will Eat

Figures Show Feed Average Is 157.4 Pounds Per Year.

It may be interesting at a time when new means of marketing incidental farm products is vitally important to know what an average hen can convert into eggs during the course of a year. There could be no more dependable or authoritative guide in this regard than the average of feed consumption in egg laying contests, determined from the records of six successive years and averaged from every province in the Dominion. These figures show that the average hen will consume 157.4 pounds of feed a year. Of this total \$3.6 is grain or meal mixture, and 22.8 per cent. green feed. Add to this 41.2 pounds of milk, and the feed supply straight from the farm totals 157.6 pounds, per bird or over 53 per cent. of the feed required. The supplementary feed included 3.2 pounds beef scrap, 1.9 pounds of grit, 3.4 pounds shell, and 1.2 pounds charcoal.

A flock of 150 hens will convert 8,856 pounds of farm grown feeds into eggs and under ordinary conditions will show 100 per cent. profit over cost of feed at current prices which is in itself a valuable item of income for any farm—Dominion Department of Agriculture.

Mounted Police Recruits

Many Applications Are Received For Enrolment In Famous Force

One branch of Canada's public service at least suffers from no lack of recruits, and figures just published showing the number of applicants for enrolment in the Royal Canadian Mounted Police indicate this colorful corps maintains its attraction for the robust and adventurous youth of the nation.

For 156 places vacated through retirement and so forth in the Royal Mounted last year, 2,807 young men offered themselves. This was an increase of about 600 aspirants over the numbers seeking enrolment in 1929.

The strength of the force, as disclosed in the annual report tabled in the House of Commons, is 1,215, made up of 56 officers, 1,057 non-commissioned officers and constables, and 422 special constables. This was an increase of four per cent. over the previous year.

The Royal Mounted dealt with 72,007 cases last year, a decrease of 10,000 in round numbers from the year before.

Time Has Been Extended

For Negotiations Regarding Equipment Of Railway Cattle Cars

An extension of the period in which negotiations might be carried out between the Railway Association of Canada and representatives of livestock shippers in order that they might reach some agreement in connection with equipping railway cars with facilities for the better transportation of livestock, has been granted by the board of railway commissioners.

The problem of shipping cattle to the various markets with a minimum of injury was presented to the board three months ago. An invention that equipped cattle cars with a movable partition was suggested both as a time saver and as something that would reduce losses in transit.

Acquire Velocity Quickly

Bodies Falling Through Air Move At Rapid Rate

Experiments have proved that the rate per second at which bodies acquire velocity in falling through the air is thirty-two feet. If a ball be allowed to fall from a tower, it is moving at the rate of thirty-two feet per second at the end of the first second after it has dropped from the hand, at the end of the next second with a velocity of sixty-four feet, and at the end of the third second at the rate of ninety-six feet per second.

Freight By Air

Freight by air is becoming an important factor of aviation in England. Nearly 2,600 tons of bulky articles were carried from Croydon aerodrome last year. These ranged from a lion in a cage to a consignment of several hundred pounds of gold.

Mid-Summer Cruise

All Europe Cruise Of The Cunarder "Lancastria" Offers Wonderful Opportunity

An important and unusually interesting mid-summer cruise to all Europe, sailing in the Cunarder "Lancastria" from New York on June 30th next, has just been announced by the Cunard Line, and Frank Tourist Company, joint sponsors of this new cruise.

The itinerary of the "All Europe" cruise reaches from the sunny shores of the Mediterranean to the beautiful Sogne Fjord, in far Norway, at its best and most beautiful at that time of the year.

Every country in western Europe with the exception of land-locked Switzerland will be visited by the "Lancastria" in the 51-days of her "All Europe" cruise. Among the striking points in the plans for this cruise are included an excursion to Rome at no extra cost, a trip on the big Cunarder through the Kiel Canal which presents magnificent scenery on every hand, and a call at Copenhagen, the attractive and sophisticated capital of Denmark.

Liberal time at many places visited will permit not only of an unusually comprehensive programme of shore excursions without extra cost, but also a number of inland trips for those who wish to amplify or extend their visit, and will appeal greatly to the many Canadians who will be making the cruise.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother's Worm Expeller.

A New Stainless Steel

Stainless steel as used for cutlery is difficult to work and cannot be used for making other domestic articles. Now, it is said, another form of stainless steel has been discovered which can be used in the place of brass, copper, and chromium-plated metals for such articles as bathroom and door fittings.

The Best Of Luck

American Soldier Receives Fortune From Father Of Frenchman He Befriended

The best of luck, which soldiers used often to wish one another in the Great War, has befallen one of them who helped another when his luck was out. The luckless one was a French polio who had been severely wounded in the last great move in 1918. An American doughboy brought him out of danger, bandaged him, exchanged cards with him, and wished him the best of luck. The American boy never expected to hear from him again. But he has just received a letter from Paris to say that the young Frenchman's father has left him \$60,000 in his will. One American, at any rate, had the best of luck in the war.

A Hazardous Calling

Many Movie Actors Lose Lives In Making Pictures

Packing thrills and tension into the movies is fraught with deaths and accidents often as tragic and thrilling as the scenes depicted. During the last five years, fifty-five actors, extras and studio workmen have lost their lives in making pictures, and scores of others received permanent or temporary injuries in the effort to provide "hair-raising" for movie fans. In addition, the California state industrial accident commission paid out \$121,850 to members of the motion picture industry for deaths and accidents arising in the course of employment.

Powerful Medicine.—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

Canada's Poultry Industry

Phase Of Agricultural Activity That Is Rapidly Forging Ahead

Canada's poultry industry is one of the phases of agricultural activity which is forging steadily ahead. The poultry population of hens and chickens for 1930, numbered 56,247,600. This represents an increase of one million birds over 1929, and is in marked contrast with the total of 12,696,701 of 1891. Present indications are that Canada's poultry population for the present year will be practically five times what it was forty years ago.

Trading In Ivory

Tons Recently Bought In London, England, At Special Sale

Nearly forty tons of elephant ivory from Africa and Asia were sold recently at a special sale at Shilling Lane, London, England. Over seven hundred elephants contributed to this collection of tusks, which was valued at many thousands of pounds. The average tusk of an elephant is under fifty pounds in weight, and is worth about \$150. London is recognized as the headquarters of the ivory trade, although of late years Antwerp has become an important centre for African ivory. Sales take place in Shilling Lane quarterly, and hundreds of manufacturers gather for it. Sales also take place in Liverpool.

Rubber Wheels For Dining Cars

The possibility of rubber dining car wheels is being studied in France by representatives of the principal French roads. Experiments are being conducted on a branch line to St. Florent, Gasconne-driven engines with rubber tires have been operating for several months, and experts believe that their adaptation for passenger cars also will lessen noise, shocks, and deterioration of the rails.

for BURNS

Minard's Liniment is the most powerful and effective remedy for burns, scalds, cuts, bruises, etc. It is a sure cure for all these ailments. Apply to burn or scald. It is a sure cure for all these ailments.

MINARD'S LINIMENT

INDIGESTION

Banished by Kruschen

"I suffered for some years from a bad stomach. I used to feel very miserable after meals. The doctor advised me to take Epsom Salts, but it did me no good. I decided to try Kruschen and am now taking it, and have done for the past 12 months, and I am very glad to tell you that my stomach is now in perfect order. I feel as young in spirit as I was 20 years ago, thanks to Kruschen. (W.R.) You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric or digestive juices fail to flow. What you need is a tonic. Nature's own tonic—Nature's salts mineral salts. You get all these six salts in Kruschen. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again, in the intestinal tract, partly digested food and prepare it for absorption into the system."

FREE TRIAL OFFER

If you have never tried Kruschen—try it now in our campaign. We have distributed a great many small "GIANT" packages which make it even for you to get a trial. Ask your druggist for the new "GIANT" 15c package. This contains our regular 15c bottle together with a separate trial bottle—worth a great deal of money. Open the trial bottle first, put it in the cup, and then it is just as good as the regular bottle. We have everything we claim to do, the regular bottle is still in the original box. You can't go wrong. You are guaranteed to return your trial bottle immediately and without cost. You have not tried Kruschen first, at our expense. You could be disappointed. Manufactured by E. J. Kruschen, Ltd., Montreal, P. Q., Canada. 1756, Avenue McMillan, Montreal, P. Q., Canada.

CHAPTER XIII.—Continued.

She stooped, motherlike, dropping a kiss on Martha's downy head. "Thank you," said Mr. Halliday, wearily. "Thank you for that, and everything."

Then he, too, stooped above the child.

"I'm going to leave you here to play with Nick and Sonny, little girl. I'll come back soon."

She lifted a tear-stained face and would have clung to him had not Gay called her attention to the tower the boys were building.

"I'll show you how, little Maria," said Sonny with importance. "I'll make a house 'most big enough for you to live in."

"Go now," Gay whispered, seeing that the child was occupied; and Halliday turned away.

He went straight to Angela's room. She stood alone, where he had left

her, and, closing the door, he faced her sternly.

"Angela," he began, "there are guests in the house, and I cannot say what I would say otherwise. This must be no scene; but once before I warned you to curb your temper. Do you remember why?"

She shrank from him, but he followed her relentlessly, and though she tried to look away the cold gleam of his grey eyes held her own while one might have counted ten. Then through the open window was wafted the sound of childish laughter—the tension of those clashing glances broke, and the woman regained her poise.

"Aren't you a trifle melodramatic, my dear husband?" she asked, shrugging. "After all, it was only a cat."

Halliday turned.

"Next time it may be a child," he replied sternly, and left the room.

CHAPTER XIV.

Angela's guests stayed but a short time, though, little Martha soon disposed of. James Halliday tried his best to be agreeable, and make them forget the awkward moment of their arrival. He even suggested a small dinner to which their next door neighbors were invited, and at which Gay appeared in a charming, sequestered gown that caused her hostess to stare almost rudely in surprise.

Angela thought she had taken Gay's measure when she described her as "that dowdy little thing next door." Not watching Halliday's interested face as he talked with their surprisingly appeared guest, she wondered if by any chance she had been mistaken. Since the days of her own courtship she had never seen her husband treat a woman just that way.

The sight roused her, not because she had any romantic feeling left for Halliday, but because she had thought him incapable of being so interested. This might come a time, she thought vindictively, when the knowledge of that interest would be a deadly weapon in her own hand. The thought brightened her eyes, making them even more blue and luminous than before. Her husband saw it, and wondered wearily, what new trouble was brewing for himself; yet later, when in the cool of the dimly lighted living-room, Angela sang, her voice might have been part of some celestial choir.

"How gloriously that woman sings!" said Nick, when he and Gay made their way home together across the garden. "She seems to forget everything, and everybody, and give herself up to the expression of her real self. It's as if it were all her own—music, and words, and her lovely way of giving them life. I felt like a fool when she made me try that diet with her, my dear."

"You needn't have. Your voice isn't trained like hers, but at least it's sincere."

"Sincere? What do you mean?" Gay drew a quick breath.

"You wouldn't understand if I told you."

"Why not? Am I really so dense as that?"

"Not in everything, Nick."

"Thanks," Nick laughed, and as they reached the porch, set down in the hammock and drew her down beside him. "Let's stay here a while and enjoy the moonlight. I don't like those aspersions on my mentality. Why should my singing be more sincere than Mrs. Halliday's?"

Gay was thoughtful for a moment before she answered: "I can't help feeling that she's playing a part, Nick; and somehow I don't care for her friends."

"They're not exactly our sort—a bit blasé and world-weary perhaps, though the woman had one lucid interval when she told me about her little girl. They must have Halliday to drink. He may be a cynic, but he has brains in his head. Still, I think you're unjust to the fair Angela. I bet those things Julie told you have stuck in your crop. Say, Gay, I think you've made an impression on Halliday! He acted tremendously interested in you tonight."

"What an idiotic thing to say!"

"If you're not careful, Madam," Nick retorted, "I shall see you for stammer. That's the saddest thing you've handed me in fifteen minutes. Besides, he'd have been the idiotic one if he hadn't noticed you. You had those other women looking like flies in a jewelry shop."

A sudden smile lighted Gay's eyes. She said: "That's what I meant about

the difference in your voice and Mrs. Halliday's."

"I don't quite get you."

"I said you wouldn't, didn't I?" Nick grinned.

"I believe you set that trap for me, my dear. But you'll have to admit that her voice is beautiful."

"Oh, I do! But unless there's a beautiful soul behind it—"

She hesitated, flushed, and added: "That may sound foolish, but—"

Gay paused again, and her husband said with a tender smile for her fancies: "Are you implying then, that my soul is superior to my neighbor's?"

"Yes," answered Gay seriously. "I am. Oh, Nick, I know you'll think me silly, but I do wish you'd be careful how you act with Mrs. Halliday. I don't trust her. Call it jealousy if you like, but it's not that it's instinct. There! I wish I hadn't said it, though it's been on the end of my tongue for months. I knew you'd laugh."

"I'm not laughing," he protested, though he was shamelessly and obviously amused. "My mouth just naturally turns up at the corners! But, as I've said before, I don't think you do the woman justice. If she's not happy with Halliday (and honestly, I don't think she is), she'd naturally take more interest in other men than would a woman who was satisfied with her own. Don't you believe that, Gay?"

"Perhaps—but but—there's such a thing as legitimate jealousy, you know."

Nick did laugh now.

"I see. Well—"

"Oh, no you don't!" broke in Gay hurriedly. "You don't see at all. I suppose I'm horrid. Perhaps I'm jealous because I can't sing with you as she can. I've always wished that I could sing. But I'm sorry I said anything if you've misunderstood me."

Her voice trembled, and Nick drew her suddenly close.

"Sometimes, dear old girl, you're just plain foolish. What's a voice, compared with the thing that makes you take off your shoes and stockings and go wading with a fellow? I don't see how you could vote my wife, or that I don't like to see your feet in those smart new pumps you're wearing; but neither could you go through life eternally bellowing duets. That's right—laugh! If anyone's been idiotic it's the lady in my arms. Won't she admit it?"

"I suppose I am; but somehow, when I watched you tonight and saw how—how terribly attractive you are—"

"Have you just found it out?" Nick arose, laughing, and lifted her with him. "In any case don't let it worry you, because you're the only woman of my acquaintance who's sufficiently naive to discover the pleasing fact. That's a corking moon, my dear. I could sit here all night, but I must leave a sliver of a family that's liable to wake early. I prescribe a few hours of sleep. Let's go up."

It was next morning that Angela's guests departed. Halliday, in an endeavour to apprise his wife for what he knew she considered his unpardonable conduct in using her room for the station, checked their trunks; and was the genuinely thoughtful host to the last minute. When the train pulled off he walked in silence to the automobile, and assisted Angela to the place beside him.

(To Be Continued.)

Worth Of a Good Rain

Is Many Million Dollars If It Comes In Right Season

Computing on the basis of average prices for the past 10 years of North Dakota crops, J. B. Kinner, weather man of the U.S. Department of Agriculture, says one good rain any time from May to August has not been a "million dollar" rain, but a 17 million dollar rain.

Using the rainfall records from May to July, he found that one inch of rainfall in North Dakota produces about six million bushels of oats, nearly three million bushels of barley, nearly one million bushels of potatoes, more than a half million bushels of flaxseed, about nine million bushels of wheat and more than 125 thousand tons of hay, to say nothing of truck garden and other crops.

W. N. C. 1933

La Grippe and "Flu" are Spreading

"Flu" First Appears as a Sore Throat, but Gains Tremendous Headway in Six Hours

AN EFFECTIVE TREATMENT DESCRIBED

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop penetrates deeply—coughing will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Experienced mothers know how valuable Nerviline is for Coughs, Colds, Sore Throat, and the little ailments that arise in every family. Nerviline in most homes is called "Mother's Best Friend." 35c at all dealers.

Cruise Around the World

Itinerary of Cunard Line "Franconia" Is Announced

The tentative Itinerary for the Cunard liner "Franconia's" cruise around the World in 1932, has just been made public in a statement by Arthur Randles, general passenger traffic manager of the Cunard Line in Canada, reveals a list of ports of call of striking diversity and attractiveness from the world cruise standpoint.

The fact that the "Franconia" is large enough for comfort at sea and yet not too large to enter most of the smaller harbours of the world opens a great many ports to her passengers which they would not be able to see were she larger. At the principal ports the "Franconia" is able to tie up to the docks, obviating the necessity of long and tedious rides in tenders from ship to shore.

Perhaps the most important new feature of the next year's cruise of the "Franconia" around the World will be an added port of call at Haifa, with more than three days allowed for her passengers to see the many historic and sacred places in Palestine. The call at Haifa will again be an included feature of the "Franconia's" cruise, with stops at both Batavia and Telok Padang planned for the 1932 cruise.

Other outstanding features of the "Franconia" cruise will be calls at Athens, Cebu, Saigon (for visits to Saigon and French Indo-China), Peking (for Bangkok), Manassas in the Celebes, and Chingwangtao (for Peking).

Relieves Asthma At Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would realize the remarkable powers of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

This reason the minister's daughter has so many good friends is because her father gives out the hints.

A man seldom meets another man who is smarter than himself.

Little Helps For This Week

"Tribulation worketh patience, and patience experience, and experience hope."—Romans v. 3, 4.

Is the road very dreary? Patience yet! Rest will be sweeter if thou art weary.

And after night cometh the morning cheer.

Just bide a wee and dimm fret! The clouds have silver lining.

Don't forget! And though He's hidden, still the sun

Courage instead of tears and vain repining.

Just bide a wee and dimm fret! "Be patient," said a Scotchman, reprovingly, to his little son.

"What is 'to be patient,' father?" inquired the child.

"Bide a wee and dimm fret!" replied the father, with a loving pressure on his shoulder.

How often God's restless children do not wait, and how often they do weary in waiting! Yet He is greatly honored by the trustful spirit, that patiently resigns the unfolding of His inscrutable purposes into His hands; for we know that a meek and quiet spirit is in the sight of God of great price.—Anna Shipman.

Douglas' Egyptian Liniment soothes the most blister known. Is valuable for stork. Leaves the hair roots in natural and healthy condition. Hair comes back. No scar remains.

Perfection Is Scarce

Artists Frequently Use Many Models To Produce Results

Many admirers of magazine covers often wonder how the artists secure such wonderful and perfect models to pose for their work and little do the public know the work required to turn out a beautiful subject. In one of artist Thorne's previous cover designs it required six different girls to pose for the model displayed on the cover. He used one for the perfect arms, one for the perfect limbs—one for the perfect hair—one for the perfect eyes and for the nose—and another for the mouth and beauty—so too many models in this case do not spoil the beauty.

SOUR STOMACH

JUST a tasteless dose of Phillips' Milk of Magnesia in water. That is an alibi, effective, yet harmless. It has been the standard alibi for 50 years among physicians everywhere. One spoonful will neutralize on one many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods.

Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid.

Remember—the genuine is always a liquid. It cannot be mistaken for any other. Look for the name Phillips. It is always the winner for your protection. Drugstores everywhere have the 50c bottles.

Before Her Baby Came

"I have used several bottles of Lydia E. Pinkham's Vegetable Compound and find it helps me wonderfully, especially before childbirth. I have five lovely children. After my last baby came I had a miserable pain in my right side so I bought another bottle of the Compound and I feel fine now. I work outside during the fruit season in addition to my housework."—Mrs. Charles Slingerland, R.R. #4, St. Catharines, Ontario.
